 **SCOTTSDALE**
THE TRUSTED STEEL-FRAMING PARTNER

DISCLOSURES

The SCOTTSDALE CONSTRUCTION SYSTEMS mission is to take care of its customers by being the safest, highest quality, lowest cost, most productive and most profitable load bearing light gauge steel framing products company in the world.

This production quality assurance manual collects all the current practices, methods, tools and organization that SCOTTSDALE CONSTRUCTION SYSTEMS utilizes to ensure the quality of its products. These elements together with this manual constitute SCOTTSDALE CONSTRUCTION SYSTEMS Production Quality Assurance System for all of its manufacturing facilities. The information compiled here will be helpful for the purposes of training, audits, internal and external reviews.

The contents of this manual will be reviewed annually and updated as required by the Industrial Engineering function within the manufacturing organization for SCOTTSDALE CONSTRUCTION SYSTEMS, to assure accuracy and completeness of the information.

The part numbers are made up as follows.

- The first 4 digits relate to the model and size of the Rollformer.
- The next 4 digits relate to the part number.
- The last number is the revision number. The higher the number the more recent the part. Revision numbers starting in the 40's are for a double rivet panel RF.
- Some parts are backward compatible – Please check before ordering.

The 1000 and 3000 parts are mostly common to all Rollformers.

Some of the older discontinued parts are not displayed in this catalogue.

The 9000 parts are subassemblies, for example 9000-1005-43 Flatten Shaft with Capseal. This is made up of a Shaft/ Piston and a Capseal.

*****When ordering please supply the Model Number and Serial Number of the RF so we can match the correct parts.*****

When ordering a piston and/or shaft combinations it will be quoted with a Capseal on the Piston and sent as an assembly.

- Once you have requested the spares (via the Knowledge Base System, see the link below), a Pro-Forma Invoice/ Quote will be emailed to you (via the KB System). This will be in Australian Dollars only.
- Once you have accepted the Pro-Forma Invoice/ Quote full payment is required.
- Once we have confirmation of payment, we will dispatch the parts.
- A tracking number for the parts will be attached to the KB System.
- Prices quoted are Australian Dollars and are only current for 15 days from the date of the quote.
- All Import Duties, Tariffs and Bank Fees are to be paid by the Customer.
